

Welcome

Welcome to Halberstadt!

Guy Moore, for the Organizers

Bielefeld Darmstadt Frankfurt Gießen

Meals: every day, mark down which meal you will eat the next day. Look near the reception, next to where you registered.

We have communicated with Management and there will be a vegan option.

Breakfast is from 7:00 to 9:00.

Two bars in the evening – one in lunch area, one in the garden.

Tischfußball, Table tennis, Pool table and gym all free of charge.

Rooms and beds: A few rooms have 2 people with 1 bed which cannot be separated.

If this happens to you, talk to Renan.

If you are alone in a room with two separable beds, also talk to Renan.

We have you trade rooms with someone else.

Retreat has two main goals:

- ▶ Review the CRC and plan for the next funding period
- ▶ Test a collaborative approach to understanding and (?) making progress on key ideas + stumbling blocks in the field

Therefore we will have

- ▶ Overview talks (Mon+Tues)
- ▶ Project review talks + progress talks (Mon+Tues)
- ▶ Project Leader sessions (Wed+Thurs) on future plans
- ▶ Young Scientist only sessions on Round Table topics

If you will present a talk

- ▶ Log in to indico page.
If you can't find it – go to CRC webpage, CRC meetings, this meeting (username **crc** password **strM1extR**) and use link there
- ▶ Use “my presentations” to upload your talk!
- ▶ If you don't have rights, talk to Irene Kehler or Sören Schlichting

If you will propose a new project

Inform Sören or me, or both, so we can schedule it.

If you are an International Advisor

We will meet at dinner on Tuesday to talk more about what we need.

You will present a review of what you think about our progress and our plans, with constructive criticism and maybe new ideas

On Tuesday, Lunch will also be Scientific Speed Dating.

We will have *assigned tables*.

You will sit with people you (hopefully) don't know.

Your job is to take turns describing and explaining what you do, and asking questions and interacting as others describe their work.

We will see if this works as an alternative to a formal Speed Dating.

Wednesday morning there are group meetings before coffee, and introductions to the Round Table topics for Young Scientists.

At lunch, YS will fill out a survey.
This is how you will choose your Round Table topic.

Renan will give a *much* more detailed explanation on Wednesday.

If you encounter any other issues, Irene Kehler, Sören Schlichting, and I are here to help get things taken care of.

Here's to a hopefully productive and informative meeting!
